---	--

- Formulated a heuristic-based approach for analyzing network censorship middleboxes
- Developed an internet filtering measurement pipeline and tested it on networks under various nations

Analysis of Google Data Safety Cards and Apple Privacy Labels

UW-Madison Security & Privacy Research Group (MadS&P)

11/2022 ~ Present

Advisor: Kassem Fawaz

- Labeled over 500 Privacy Policies and trained them to data safety card options with DistilBERT
- Analyzed over 2000 responses from the developer inquiry about data safety card inconsistencies
- Modeled an inference-based analysis approach to analyze the consistencies within privacy documents

Engineering Privacy in iOS App Groups

Carnegie Mellon University Information Networking Institute (INI)

Summer 2022

Advisor: Hanan Hibshi

- Implemented a data leakage threat model for the iOS app group containers
- Analyzed the group containers for 200 iOS apps to detect potential leakage for restricted data
