Research

Shawshank Intel: A Heuristic-based Analysis of Network Censorship Mechanisms	09/2022 ~ Present
UW-Madison Security & Privacy Research Group (MadS&P)	Advisor: Rahul Chatterjee

- Formulated a heuristic-based approach for analyzing network censorship middleboxes
- Developed an internet filtering measurement pipeline and tested it on networks under various nations

Analysis of Google Data Safety Cards and Apple Privacy Labels 11/2022 ~ Present
UW-Madison Security & Privacy Research Group (MadS&P) Advisor: Kassem Fawaz
- Labeled over 500 Privacy Policies and trained them to data safety card options with DistilBERT
- Analyzed over 2000 responses from the developer inquiry about data safety card inconsistencies
- Modeled an inference-based analysis approach to analyze the consistencies within privacy documents

Engineering Privacy in iOS App Groups Summer 2022
Carnegie Mellon University Information Networking Institute (INI) Advisor: Hanan Hibshi
- Implemented a data leakage threat model for the iOS app group containers
- Analyzed the group containers for 200 iOS apps to detect potential leakage for restricted data

picoCTF: Introducing Adversarial Machine Learning to CTFs Summer 2022
